

PRESSGLASS

SIMULATED DIVIDED LITE MUNTIN

www.pressglass.us

TAKE YOUR GLAZING CAPABILITIES TO THE NEXT LEVEL BY ADDING AESTHETIC APPEAL COMBINED WITH HIGH QUALITY PRODUCTS!

WHO:

Press Glass now offers Simulated Divided Lite (SDL) Muntins. These are tools for enhancing the look of single, continuous lites of glass.

WHAT:

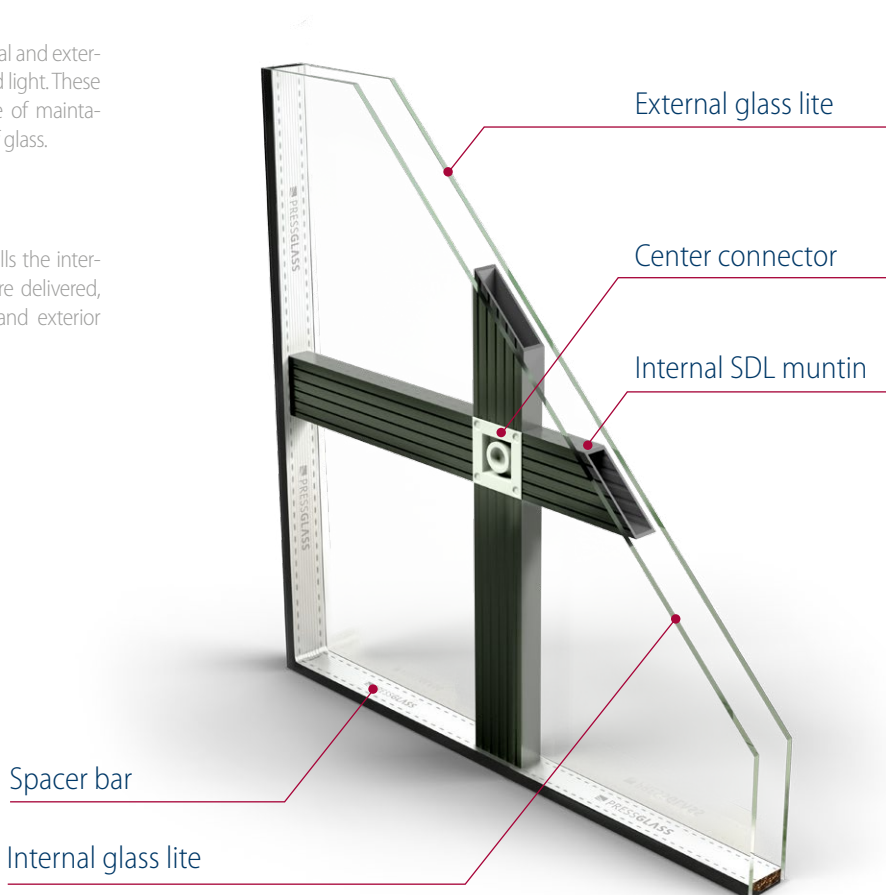

SDLs are permanently applied internal and external muntin bars that simulate divided light. These SDLs present an added advantage of maintaining the integrity of a single pane of glass.

HOW:

During fabrication, Press Glass installs the internal SDL muntins. When the units are delivered, the Customer applies the interior and exterior SDL muntins.

COLORS:

Black is offered as the standard color and will be kept in stock. Additional color options may be requested.
