

PRESSGLASS BIRD SHIELD

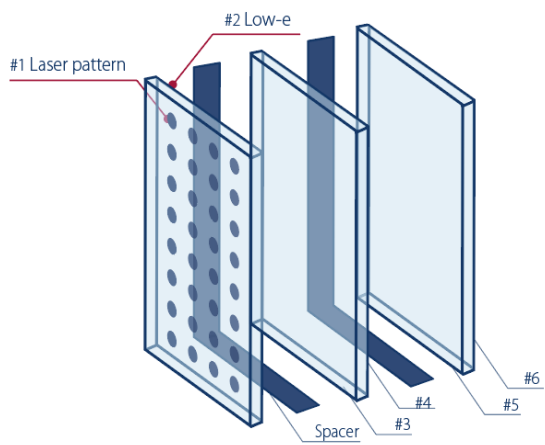

Bird friendly glass with a laser printed pattern on surface #1. PRESSGLASS BirdShield not only offers outstanding bird protection but also enhances the aesthetics of architectural spaces. Additionally, it helps ensure high thermal insulation and solar energy efficiency, thanks to the applied low-e coatings.

Double IGU

Triple IGU

Available Coatings	Glass Substrate	Threat factor	Maximum Size
Guardian SunGuard® SNX70+	Clear	22	126"x236"
Guardian SunGuard® SN68	UltraClear™	30	
Vitro Solarban® 70	Clear	20	
Vitro Solarban® 60	Clear	19	
Vitro Solarban® 72	Starphire®	30	

We are working on extending our PRESS GLASS BirdShield offering by adding more low-e coating options.

AVAILABLE PATTERNS FOR PRESS GLASS BIRDSHIELD

Non-directional
2" x 2", Gray

HOW IS THE THREAT FACTOR (TF) FOR BIRD-FRIENDLY MATERIALS CALCULATED?

AMERICAN BIRD CONSERVANCY (ABC) defines bird -friendly material as having a threat factor (TF) of less than or equal to 30. Methods listed below are used to determine TF:

- Tunnel testing;
- Meeting ABC's Prescriptive Rating criteria;
- Using test results of peer-reviewed protocols that ABC have determined to be equivalent or translatable to tunnel testing scores.
